

HAM-LET's Protector Fitting protects instruments and pressure gauges from sudden rises in pressure, a phenomenon that has a negative impact on the instrument's operation and accuracy. This fitting prevents penetration of contaminants from the gas or fluid of the hydraulic or pneumatic systems into the expensive and accurate control instrument mechanism, which could cause it to malfunction.

**Note:** The Protector Fitting is not a filter substitute, and should only be used to provide additional protection for the control instruments.

For systems requiring a filter because of contaminants in the gas/fluid, choose the appropriate filter suitable for the application from HAM-LET catalog, filter pages.

#### METHODS OF OPERATION

The fitting has a sintered filtering element made of St.St. 316. The element is sinterd to the body of the fittings. The pores in the filtering element absorb the pressure hits occurring in the hydraulic/pneumatic systems, thus preventing sudden fluctuations in the instrument's mechanism. This operation protects the pressure gauge, lengthens its life span and maintains its accuracy.

#### SPECIFICATIONS

- End types include NPT, BSPP, BSPT Male & Female, Reducing NPT, Reducing BSPP, Reducing BSPT Male & Female.
- NPT, BSPT, LET-LOK<sup>®</sup> to BSPP
- NPT, BSPT, Face Seal HTC Connector to BSPP
- Face Seal HTC<sup>®</sup> Connector GSW Glands
- The filtering element is sintered to the body of the fitting, enabling it to work with differential pressure of up to 6000 psi (408 bar) in St.St. fittings 1/8" male NPT.
- 5 types of filtering elements, suitable for light gases up to oil in viscosity of 1000 SUS and more
- The body of the fitting is made of St.St. 316 or Brass.
- Max. working temperature in St.St. 1022°F (550°C), Brass 430°F (220°C)
- Suitable for steam

#### VISCOSITY CONVERSION TABLE FROM SUS\* TO CENTISTOKES

Viscosity in Centistokes	For Viscosities of 32 to 100 Saybolt Universal Seconds: Centistokes = .2253 x SUS - <u>194.4</u> SUS	CS= .2253 SUS- <u>194.4</u> SUS
Viscosity in Centistokes	For Viscosities of 100 to 240 Saybolt Universal Seconds: Centistokes = .2913 x SUS - <u>134.6</u> SUS	CS= .2193 SUS- <u>134.6</u> SUS
Viscosity in Centistokes	For Viscosities Greater Than 240 Saybolt Universal Seconds: Centistokes = $\frac{SUS}{4.635}$	CS= <u>SUS</u> 4.635
NOTE: Sayt	oolt Universal Seconds is often abbreviated SSU.	

# **CLEANING AND PACKAGING**

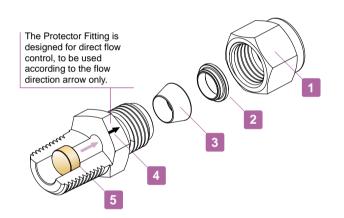

Passivation, Cleaning and Packaging (Procedure 8075). Ham-Let Protector Fittings with Face Seal End Connections are treated with Ham-let Oxygen Cleaning and Packaging (Procedure 8055). Oxygen Cleaning and Packaging for other end connections are available as an option.

### **TESTING:**

Burst and Leakage.

# VeP Vent Protector Fittings

# DESCRIPTION

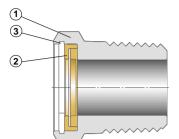

The Vent Protector Fitting (VeP) is used to protect tubes exposed to atmospheric pressure, instruments with that are open to atmospheric pressure and every tube outlet that is open to atmospheric pressure.

1/2 inch

3/4 inch 1" inch

# MATERIAL OF CONSTRUCTION

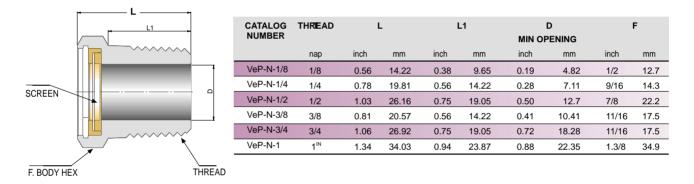

ITEM NO.	DESCRIPTION	MATERIAL	1/QYY.
1	Vent Fitting Filter Body	St.St. 316	1
2	Vent Fitting Filter Grid 40 Mesh	St.St. 316	1
3	Spring clip 20 DIN472	St.St.	1

# METHOD OF OPERATION

The end of the fitting has a filter screen of 40 mesh, made of 316 st.st. This screen prevents foreign objects such as insects from entering the system and causing damage.

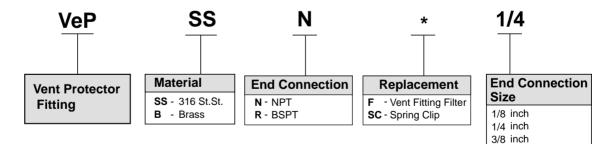

This fitting is available in 316 stainless steel and in brass, in sizes from 1/8" to 1".

The threads are NPT, BSPT or others according to request.

# How to Order

Your safety is important to us, please ensure proper reference to our latest catalog

\* Example

When ordering a filter replacement, please order VeP F 1/4.

# **CLEANING / PACKAGING:**

Ham - Let Vep are treated with Ham-Let

Passivation, Cleaning and Packaging (Procedure 8075). Ham-Let Vep with Face Seal End Connections are treated with Ham-let Oxygen Cleaning and Packaging

# TESTING:

The Vep designs have been tested for Proof, Burst and Leakage. Every Vep is factory tested for propper assembly.

# Warning - for your safety:

Select the right component for safety's sake: The total design of the system must be taken into consideration when selecting components in order to ensure that your Ham-Let products provide safe, trouble-free operation. It is the responsibility of the system designer and the user to consider the compatibility of the materials, of the components and system, the function of the component, apprpriate ratings and to ensure proper installation, operation and maintenance.

Improper selection or use of products can cause property damage or personal injury, in respect of which the system designer and/or the user shall be solely liable and responsible.
